UHS OFFERS PEP AND PrEP!

Did you know there is medication that can prevent HIV? When taken as directed both PEP and PrEP are highly effective at preventing HIV.

Is PEP or PrEP right for you?

**Post-Exposure Prophylaxis (PEP)**
- Taken after a single high-risk exposure to HIV
- Must be started as soon as possible - always within 72 hours of a possible exposure
- Prescribed a 28-day course of 3 antiretroviral medications
- Baseline screening will be needed before initiating PEP.

**Pre-Exposure Prophylaxis (PrEP)**
- Medicine taken by people that are at ongoing risk for getting HIV from sex or injection drug use
- Reduces the risk of getting HIV from sex by about 99% when taken as prescribed
- Baseline HIV test needed before taking PrEP

**OTHER SERVICES PROVIDED BY UHS**
- Treatment for acute and chronic illnesses
- Treatment for mental illness
- Treatment for minor injuries
- Gynecological Services
- STI Screening
- Physical Exams
- Immunizations
- Lab
- Pharmacy
- X-Ray
