

SMART CITY ROBO RESCUE

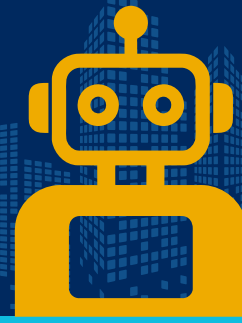

DAILY SCHEDULE | AUGUST 3- AUGUST 7

What if robots could rescue pets, clean the environment, and make our cities safer? In Smart City RoboRescue, campers explore that question by designing their own smart city using LEGO Spike robots, Ozobots, Merge Cubes, and 3D-printed creations. Throughout the week, young engineers will tackle real-world challenges, code robots to solve problems, and build innovative solutions for safer, smarter communities. The week culminates in an exciting Friday showcase where campers present their smart cities!
