- R03/R21 (resubs) - Due Nov. 16
- R15 (all) - October 25
- Postdocs may be interested in the Research Career Development Program (K series) - Due Oct. 12

Reminders

Per Beverly Roberts, Associate Director, Post Award for Research and Sponsored Programs

NIH This is a reminder that the **NIH Research Performance Progress Report (RPPR)** Section D 'Participants' (i.e., those working on the project) requires anyone working 160 hours or more during the reporting period, **whether paid or unpaid** on the grant, be included in this section. 160 hours is NIH's definition of one person month. It is incumbent on PIs and those working on NIH-funded projects keep a record of any unpaid time to include on the report.

It's recommended that at the **beginning of an NIH-funded grant or an existing grant's budget year**, to contact Sue Tribuzzo in Sponsored Programs — stribuzz@kent.edu — to have anyone anticipated to be working at that level (160+ hours) for the reporting year to be registered in the Commons. This will include postdocs and students as well.

NSF As a reminder, in 2009 the National Science Foundation implemented a requirement of the America COMPETES Act, for [Responsible Conduct of Research \(RCR\)](#) training for undergraduate students, graduate students, and postdoctoral researchers participating in funded research.

Principal Investigators are reminded to direct their students and postdocs to the University's [CITI](#) subscription to complete the RCR module before assuming duties **on an NSF-funded project**. Anyone without a CITI account can register first with CITI on this page. **The NSF also now strongly recommends PIs complete RCR training as well.**

Welcome 1st Year Graduate Students!

Upcoming Schedule

Please click [here](#) for the up-to-date schedule.
