

Pilot - Second in Command (SIC) | Aery Aviation Cleveland, Ohio, United States

Aery Aviation, LLC is a dynamic full-service aviation company experiencing rapid growth with a lot of opportunities for advancement and new skillsets. The company is a global aerospace, defense, aviation design, engineering, modification, and flight operations company with multiple bases throughout the country. Aery Aviation serves the U.S. Government and Commercial clients worldwide with customized and unique solutions for their operations. This is one of the best times to be involved with our company as we continue to innovate and integrate our product offerings by expanding our outreach and clientele base.

Exciting times at Aery! We are looking to hire several **Second in Command (SIC) – Pilots** and operate our Beechcraft Premier I/IA aircraft based to our Cleveland Clinic Foundation (CCF) in Cleveland, OH for our organ procurement and Critical Care Flight Missions. The SIC must maintain a strong track record in aviation that includes a focus on safety and successful flight experience in an on-demand industry. The rotation will be 3 days on with 3 days off with the crew being readily available to depart within 2-hours of call out.

Main Job Tasks and Responsibilities:

- The selected SIC pilots, while on rotation, must maintain the proper rest requirements and be readily available for all flight missions.
- They will look to assist the medical crew with the loading and unloading of critical care patients.
- Review the flight profiles with the PIC to ensure all flights will be operated in a safe manner.
- Comply with the company's General Operations Manual (GOM) and Part 135 operations.
- Participate in monthly safety and training events with the hospital that includes safe aircraft operations and internal protocols for improved efficiencies.
- Coordinate with the PIC and Dispatch Operations to forecast mission requirements, aircraft availability, scheduled services, off-site deployment support, aircraft inspections, and mission skills currency.
- Establish and adhere to flight operations reporting procedures IAW FAA mandated requirements and company management, ensure accurate and timely reports to all applicable government agencies.

- Participate in monthly staff meetings with the Flight Department and Maintenance Manager.
- Prepare the aircraft for the day's flights with special attention to; cleanliness of the aircraft, preparation of the mission-critical profile, and ensuring supplies are stocked and ready for all deployments.

Qualifications (Required Knowledge, Skills, Abilities, and Certifications/licenses):

- First Class Medical.
- Minimum 500 hours total flight time.
- Bachelor's degree in Management or Aviation related preferred.
- Drug-Free Workplace Drug Testing Program participation.
- The ability to pass a criminal background check.
- No FAA violations or accidents.
- Valid driver's license.

Preferred Knowledge, Skills, Abilities, and Certifications/Licenses:

- Excellent cockpit management resource skills.
- Ability to establish priorities, work independently, and proceed with objectives without supervision.
- Ability to handle and resolve technical issues and problems.
- Thorough understanding of FARs.
- Ability to work in and foster a team environment.
- Reside or relocate within 30 minutes of the base airport.
- Work various shifts and schedules, including nights, weekends, and holidays.
- Lift 75+ lbs.

Benefits:

We offer the ideal candidate the opportunity to be part of a progressive organization and provide a competitive compensation and benefits package. Interested parties should apply to the LinkedIn posting for consideration. For more information on our company, please visit our website at www.aeryaviation.com.
