

Bingo assignment (25 pts)

Choose 25 different Elements from the Periodic Table and provide the following information:

Element name, element symbol, Atomic #

2 interesting facts (how the element is used, made, isolated...whatever catches your fancy...)

Example of format:

Hydrogen, H, 1

Can be made thru the electrolysis of water.

Hydrogen is used to convert vegetable oils to solid fats.

You do not need to cite resources...I know that you are taking the info from the internet....
