

# Using the Camera and Microphone with Blackboard Collaborate Ultra

1

## Make sure camera and microphone are plugged into computer.

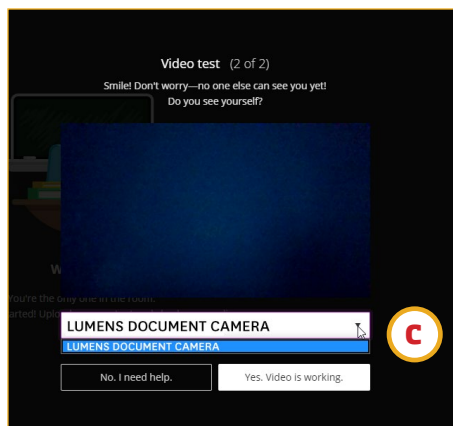

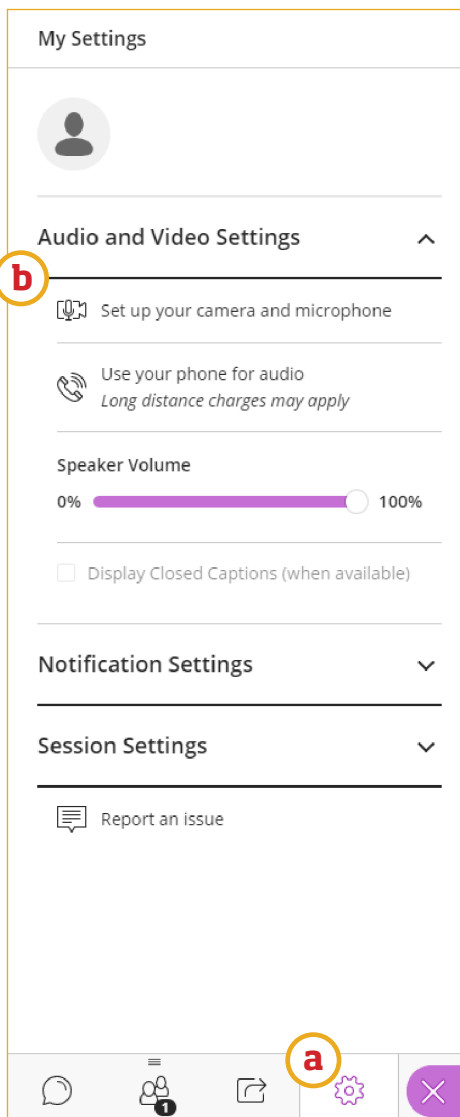

Both the camera and microphone use simple USB-A connections. If their USB cables are plugged in, the computer will recognize them.

2

## Launch Blackboard Collaborate Ultra

Collaborate Ultra should recognize the camera and microphone automatically. If it does not or you are using your own computer with this equipment for the first time, you will need to follow these instructions.

- a** Complete the audio/video check when prompted or select the settings gear icon.
- b** Under Audio and Video Settings choose "Set up your camera and microphone"
- c** In the dropdown box, choose...  
Mic: "ATR4650"  
Cam: "Lumens Document Camera"

### Camera

Lumens DC-125 High-Definition Portable Camera

### Omnidirectional Microphone

Audio Technica ATR4650-USB Computer Microphone
