Rankings & Dean's List:

- At the conclusion of every semester, the Office of Academic Services & Institutional Research calculates rankings (based on cumulative grade point average) for each class year. Students are ranked by number and percentile. At the conclusion of the fourth-year summer, if there are multiple students ranked first, total points earned on all examinations during the entirety of the program will determine the students ranked first and second in the class.
- Full-Time students who finish any fall or spring semester with a term grade point average of 3.500 or better without any failures will be placed on the dean's list. Students are not placed on dean's list for summer semesters or for any semesters in which only pass/fail courses or rotations are completed.
