Student Accessibility Services at Kent State University provides services and support to students with disabilities. To ensure the provision of reasonable and appropriate accommodations for our students requesting an assistance animal accommodation, we need current, comprehensive documentation of the student’s disability from their diagnosing or current treatment provider. This should include information that describes the symptoms of the disorder, including the impact on the student’s daily living and learning activities, the severity and duration of the diagnosis, and recommendations for treatment. In addition, documentation for an assistance animal accommodation should outline the therapeutic relationship between the student and the animal, such as the specific benefit to the student for having the animal, the duration of the relationship, and the animal’s name. The information requested here can also be submitted in a narrative form via a letter from the provider.

For additional information about SAS, including the full assistance animal policy, please visit: www.kent.edu/sas

Name of student:
