Instructor

CS 10062 - Programming for Problem Solving in Sciences

While classes are conducted on the premise that regular KSU attendance policy to be successful on time and engaged in classroom proceedings. I am required by the University to fulfill the Academic Presence requirement. It is each student's responsibility to not leave his/her work will not be accepted that the work will not be accepted appeal emanates. The general principle that applies to the following procedures is student conduct. Academic Sanctions student conduct officer may be removed by the instructor. The grade will count as an no trouble answering the quiz question. The lab is an important part of the class. Turning labs in:

There is a weekly lab. A study guide for the final exam will be posted on my web page. The final exam is comprehensive. A make-up exam will only be given in the case of an

athletic event should present a "Class Absence Authorization Form" identifying the absences and identifying the event sponsor’s name and contact information to instructor before the end of the second week of the semester.

- Other - Other legitimate reasons for class absence include death in the immediate family, or religious observance. Students should provide legitimate verification of participation in attendance at the aforementioned events.

Missed Class Policy: It is up to the student to make up any missed material. If class is missed it is best to get notes from a fellow student (who has taken good notes). This will be the best record of what transpired during the class meeting. Sometimes, in response to questions or as seems beneficial, further explanation will spontaneously be created by the instructor and written on the board. The instructor may retain no written record of this.

Handwriting Policy: All handwritten work must be legible to the instructor and grader.

- This includes not writing using tiny characters. Unreadable (by the instructor) work will not be graded and the points will be lost.

Grade Determination Policy: A student's grade will not be changed because the student needs a better grade. Grades are determined by the weights and grading scale specified above.

Extra Credit Policy: There is no extra credit.

Email Policy: All email to the instructor must be sent from your kent.edu email account. Email from other accounts will be ignored by the instructor.

- This requirement is so that the instructor is certain who he is communicating with.

Assignment Regrading Policy: Assignments will not be regraded to allow students to improve their score. Fulfill the requirements so that there are no point deductions when the lab is graded. One exception, the Program Run Policy.

Program Run Policy:

Programs that partially complete when run will be graded at the instructor's discretion with a deduction for any problems and for the incomplete running. Otherwise programs that don't run will be quickly looked over and if it seems like the program is mostly done a 50 deduction will be given. You may fix your program and resubmit it with a 6 point deduction for the first occurrence (one time only) and a 8 point deduction for all subsequent occurrences (these deductions will accumulate on a lab). The program must be fixed and resubmitted by end of the third day following the day the score was assigned.

- An email must be sent to the instructor when the program has been fixed and resubmitted.

Requirements Awareness Policy: It is the student's responsibility to be aware of the contents of the syllabus.

Requirements Awareness Policy: 

- It is the student’s responsibility to be aware of assignments, exam and other important information on the instructor's web site or in Blackboard. The instructor will go over requirements in class as they become relevant.

Syllabus Amendment Policy: The instructor may amend the syllabus. The syllabus may be amended for clarification. Any amendment that is made will only be made such that it is of possible benefit to every student at the time the amendment is made. Any amendment will be added in color with the material that we cover in class as appropriate.

Miscellaneous

Do not talk to others during class.

It is very distracting to other students when someone talks to another person during class.

When whispering your voice carries further than you likely realize.

- Read the online notes. The online notes contain the material that you will be expected to know.

Do not make audible noises during class.

- It is a distraction of the class when a device begins making noise.

The instructor may occasionally address a student in class by her/his first name.

- If you do not want this for yourself notify the instructor in person AND by email.

This course will include computer programming. Computer programming is best learned by writing computer programs. You will need to spend time at the computer writing programs.

- Start work on a programming lab as soon as possible after it is given. This will allow you to discover things that aren't clear to you and ask questions about them. It is hard to write a program quickly at the last minute, so it is highly recommended to avoid this situation.

If you need to leave class early please inform the instructor before class begins and, if possible, sit near the door.

- See my web pages (www address above) for additional information, labs, etc.

If you have any problems, including understanding the material that we cover in class or using the computer, please talk to me.
