Course covers introductory concepts of C#: development environment, variables, decisions, looping, arrays, strings, methods, exceptions, and event handling. Prerequisite: none.

ACM Course Learning Outcomes for Syllabi

Demonstrate best practices for designing end-user computing interfaces.

Discuss software development methodologies.

Use a programming or a scripting language to solve a problem.

Discuss significant trends and emerging technologies and their impact on our global society.

Disability Accommodation Statement

University policy 3342-3-01.3 requires that students with disabilities be provided reasonable accommodations to ensure their equal access to course content. If you have a documented disability and require accommodations, please contact the instructor at the beginning of the semester to make arrangements for necessary classroom adjustments. Please note, you must first verify your eligibility for these through Student Accessibility Services (contact Amanda Dolan at adolan5@kent.edu or 440-964-4304 or visit http://www.kent.edu/ashtabula/accessibilityservices) for more information on registration procedures.

Academic honesty:

Cheating means to misrepresent the source, nature, or other conditions of your academic work (e.g., tests, papers, projects, assignments) so as to get undeserved credit. The use of the intellectual property of others without giving them appropriate credit is a serious academic offense. It is the University's policy that cheating or plagiarism result in receiving a failing grade (0 points) for the work or course. Repeat offenses may result in dismissal from the University. Kent State University policy on academic honesty can be found at: www.kent.edu/policyreg/administrative-policy-regarding-student-cheating-and-plagiarism

Registration

Per University Policy, students have the responsibility to ensure they are properly enrolled in classes. You are advised to review your official class schedule in Flashfast (located in the "Student Tools" tab in Flashline) during the first two weeks of the semester to ensure you are properly enrolled in this class and section. Should you find an error in your class schedule, it is your responsibility to correct the error. Students who are not officially registered for a course by published University deadlines should not be attending classes and will not receive credit or a grade for the course.
