Proposal Summary

Explain the purpose for this proposal:

The purpose of this proposal is to revise the prerequisites and writing expectations. Regarding prerequisites, there was an oversight on the original workflow stipulating a prerequisite for this class was 43102. That course (43102) actually comes later in the Roadmap for students. The intended prerequisite for this class was 43100 which is in semester 3.

Explain how this proposal affects program requirements and students in your unit:

This will enable a smooth registration process when students register because the prerequisite problem will be ameliorated and they won't need an override. It will not affect any other courses or program requirements.

Explain how this proposal affects courses, program requirements and student in other units:

This will not impact other courses, program requirements, or students in other units.

Explain how this proposal affects enrollment and staffing:

This will not impact enrollments. It will affect advisors and administrative assistants positively in that it will be less work for them. They will not have to request overrides for students to register for the class.

Units consulted (other departments, programs or campuses affected by the proposal):

This will not impact other departments, programs, or campuses.
