* During the second year, students are required to complete and turn in a portfolio of work completed for the program and practicum. In addition, students will fill out a performance-based self-evaluation to be compared to one that is completed by the program faculty that assesses internship readiness. Finally, depending on background and experience, additional coursework may be required in years 1 & 2

** These courses may be offered during Fall or Spring; however, there are program-specific sections that must be taken according to the designated offering for any given year. Students should consult with their advisor to make certain they take the designated sections of these courses.

Notes:

1. Students may not enroll in Year 2 Coursework prior to completion of Year 1 coursework unless the student's advisor and the course instructor have agreed to an exception. The student understand the ramifications of the early enrollment, including an increased need for self-study in prerequisite areas.
2. Students are responsible for completing the approved course of study that is in effect at the time of the approved prospectus is filed
3. Ed.S. graduation is typically the summer at the end of the internship experience
4. SPSY courses are offered only in the semester shown; other courses may be offered at other times as well.
