

# Create Items in Blackboard Courses

The Item tool in Blackboard makes it easy to create online content, including text, images, and more, for your students in your face-to-face, hybrid, and online courses. Items can also be used instead of the File tool for document uploads with the added benefit of being able to include a description or contextualization of the file.

## 1. Access your course

### 1.1 Log into Blackboard

Log into Blackboard Learn at <https://learn.kent.edu> or through Flashline.

### 1.2 Enter your course

Click on the name of your course to access it.

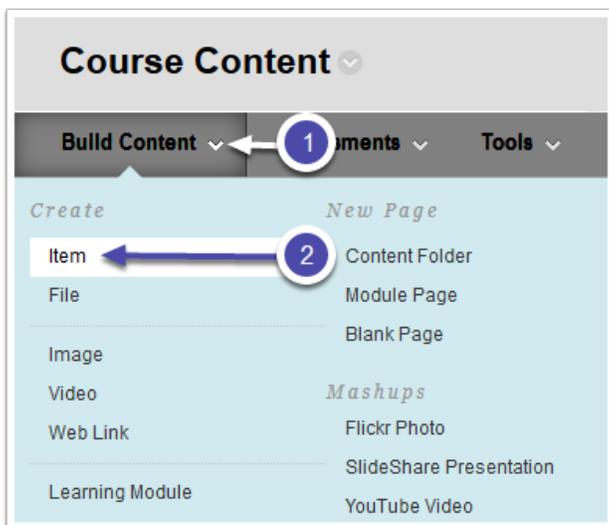

## 2. Upload a file

### 2.1 Navigate to a content area or folder

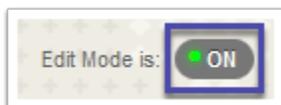

Navigate to the content area or folder in which you want to create the item.

### 2.2 Create item

In the Action Bar across the top of the page, select **Build Content**. Then click **Item** from the drop-down menu.

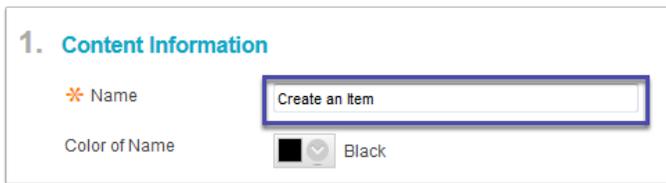

**Note:** If the Action Bar does not appear at the top of the page, make sure that **Edit Mode** is turned **ON** (toggle button in the upper right corner).

## 2.3 Name the item

In Section 1: Content Information on the Create Item page, type a **name** for the item.

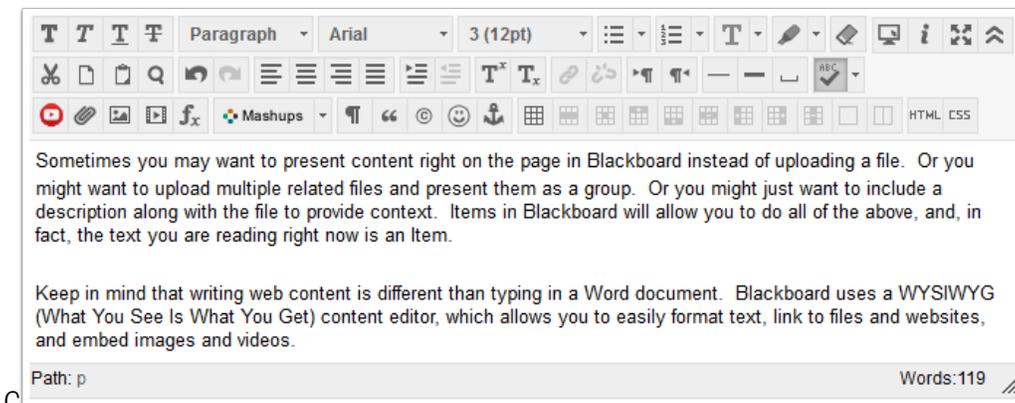

**1. Content Information**

\* Name

Color of Name  Black

## 2.4 Type in your content

Type in your content (or paste from a word processor). Use the Content Editor toolbar to format the text and embed additional content such as images, videos, etc. Not that pasting from Word can sometimes cause formatting issues. In this case, highlight the pasted text, click the clear formatting button, and then use the Content Editor tools to format. [Explore the Content Editor tools.](#)

Sometimes you may want to present content right on the page in Blackboard instead of uploading a file. Or you might want to upload multiple related files and present them as a group. Or you might just want to include a description along with the file to provide context. Items in Blackboard will allow you to do all of the above, and, in fact, the text you are reading right now is an Item.

Keep in mind that writing web content is different than typing in a Word document. Blackboard uses a WYSIWYG (What You See Is What You Get) content editor, which allows you to easily format text, link to files and websites, and embed images and videos.

## 2.5 Attach files

In Section 2: Attachments, use the **Browse My Computer** or **Browse Course** buttons to attach files (optional). A dialog box will pop up. Locate and select the file(s) to attach.

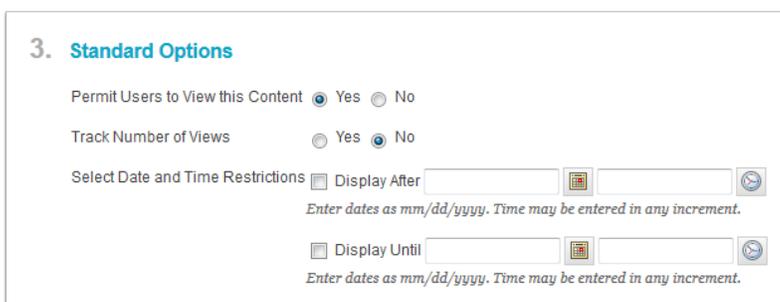

**2. Attachments**

*If you select a file you do not want, click **Do Not Attach** to remove the attachment from the content item.*

Attach File

## 2.6 Select options

In Section 3: Standard Options and set your file options as desired.

**3. Standard Options**

Permit Users to View this Content  Yes  No

Track Number of Views  Yes  No

Select Date and Time Restrictions  Display After

*Enter dates as mm/dd/yyyy. Time may be entered in any increment.*

Display Until

*Enter dates as mm/dd/yyyy. Time may be entered in any increment.*

**Permit Users to View this Content:** This is your show/hide option. If you select **Yes**, the file will be available for students to view and download; if you select **No**, the file will be hidden from students. **Note:** If you enable the Date/Time Restrictions, make sure to set this option to Yes, or else it will override the date/time settings (and the file will not become available).

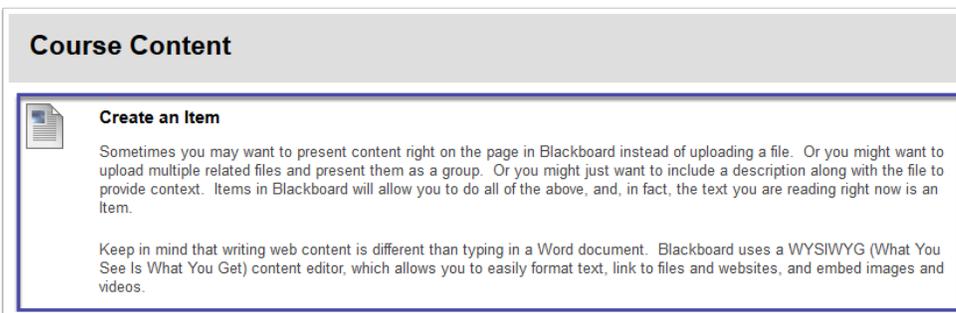

**Track Number of Views:** Set this option to **Yes** to turn on Statistics Tracking for this file. When enabled, you can run a report to see which students clicked on the link to the file.

**Select Date and Time Restrictions:** You can make a file available to students for a given date/time range. The **Display After** date/time is when the file will appear and the **Display Until** date/time is when the file will disappear. To make the file permanently available, leave these boxes unselected.

## 2.7 Submit

When you are finished setting the options, click the **Submit** button.

Students can now view the item right on the page in Blackboard.

**Course Content**

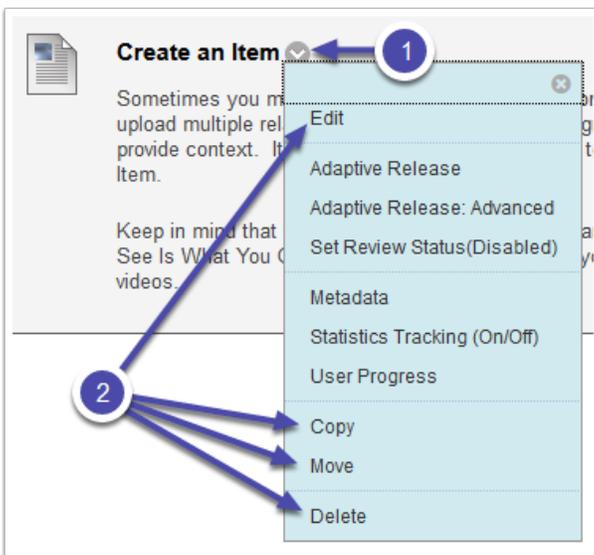

**Create an Item**

Sometimes you may want to present content right on the page in Blackboard instead of uploading a file. Or you might want to upload multiple related files and present them as a group. Or you might just want to include a description along with the file to provide context. Items in Blackboard will allow you to do all of the above, and, in fact, the text you are reading right now is an Item.

Keep in mind that writing web content is different than typing in a Word document. Blackboard uses a WYSIWYG (What You See Is What You Get) content editor, which allows you to easily format text, link to files and websites, and embed images and videos.

## 3. Edit, copy, move, or delete an item

To edit, copy, move, or delete an item, click the **Action Link (drop-down arrow)** next to the item name and **select the desired option** from the drop-down menu.

**Create an Item**
